

# eServices Register Training - Supplier

Norman Kennedy – Dept of Premier and Cabinet  
Matthew Clyne – VendorPanel

# eServices Register Update

---

## Background

- On 1 July 2013, the eServices Register replaced the eServices Panel which started in 2003.
- The Register was implemented on the Ariba Cloud Platform.
- In 2016/2017 DPC conducted a procurement process to test the market for platforms suitable to deliver the eServices register and potentially be expanded to cover other procurement categories.
- That process has concluded with the selection of VendorPanel, a multi-award winning platform developed and supported by a Victorian technology company.
- A non mandated State Purchase Contract, specifying VendorPanel, has been set up for the supply of Procurement Platforms.
- The eServices Register is the first such application.
- Suppliers are already registering and as at 24 May, over 440 are already approved.

## Why the change

- We wanted to make it simpler and easier for Buyers and Suppliers to engage with each other via the eServices Register.
- VendorPanel provides better and easier reporting of use of the eServices Register.

## What's not changing

- The mandated eServices State Purchase Contract is continuing with the same rules. It is to be used for the purchase of ICT solutions for Victorian Government Departments and Agencies.

## Key dates

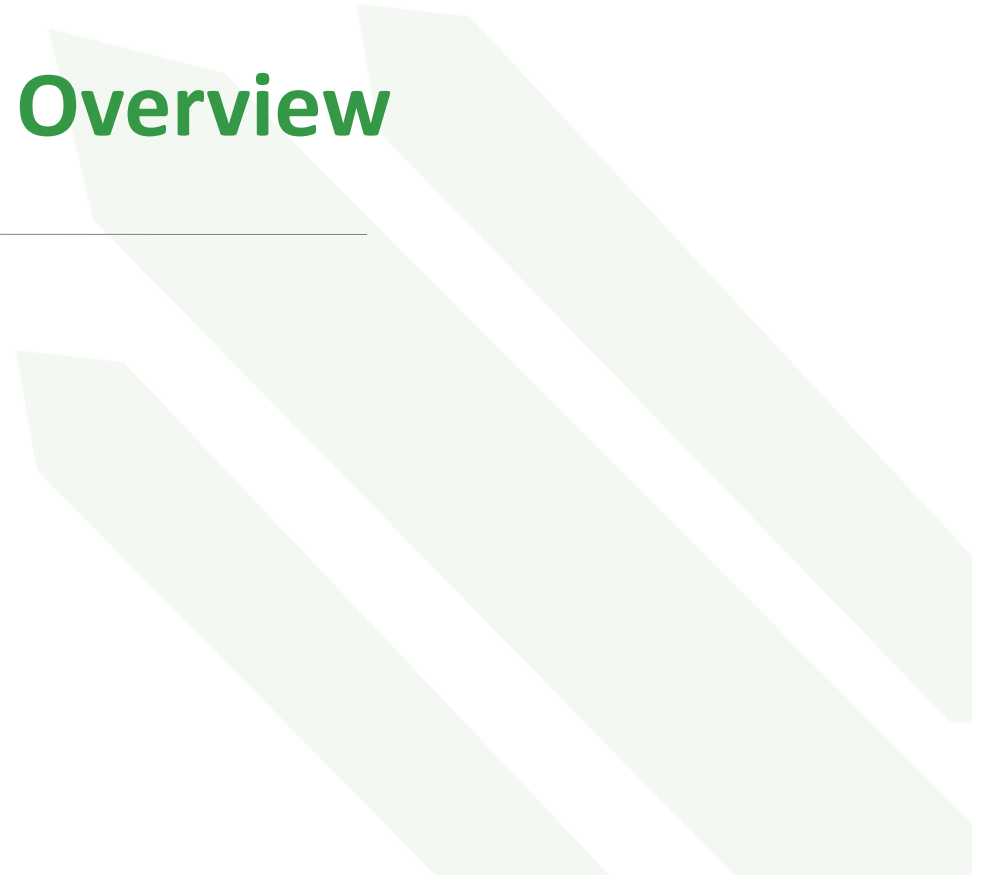

- From 25 May 2017, registrations on the Register will be manually processed via the eServices team.
- From 1 June 2017, new opportunities in eServices will start being posted via VendorPanel. You must register to access eServices via VendorPanel.
- The Government's licence with Ariba will end on 30 June 2017 and therefore all access to eServices related data in Ariba will cease at that time.
- Please Note: eServices related data in Ariba will be destroyed 120 days after the licence ends.

## Key dates

- Phase 1: Simple structure
- Phase 2: Supplier pre-qualification and compliances
